The 70WQ4 is a rugged, 7-inch video monitor designed to withstand the vibration demands of collision avoidance systems. Rated to endure shocks up to 10Gs, the 70WQ4 can be used in a variety of vehicle applications and is the ideal monitor solution for applications requiring additional simultaneous coverage. Split screen and picture-in-picture functions allow drivers to focus on one camera while keeping an eye on additional views, creating the ideal solution for trucks with additional articulating equipment installed.

### Integrated Control Box

The 70WQ4 does not require a separate control box, allowing for a much cleaner and easier installation.

### Features

- IP69K rating ensures protection against dust and liquid
